

# FIRE HOSE REEL TESTER

FLOW METER FOR THE REGULAR INSPECTION OF FIRE  
HOSE REELS ACCORDING TO DIN 14462 AND TRVB 128S

**WHD**

- » VDS approval in progress
- » Incl. calibration certificate (EN 17025)<sup>1)</sup>
- » Wide range of connection options

<sup>1)</sup> Calibration rigs are provided with reference instruments according to EN 17025.

## TECHNICAL DATA

| Technical details                        |                                     |
|--|-------------------------------------|
| » <b>Pressure</b>                        | » 0 ... 232 psi (0 ... 16 bar)      |
| » <b>Flow rate</b>                       | » 0 ... 800 lpm                     |
| » <b>Medium</b>                          | » Water                             |
| » <b>Medium temperature</b>              | » 39 °F ... 122 °F (4 °C ... 50 °C) |
| » <b>Accuracy class (pressure gauge)</b> | » 0.5                               |

## FLOW MEASURING RANGES

| Orifice plates according to DIN 14462:2023-07                             |                           |       |                           |        |                             |
|---|---------------------------|-------|---------------------------|--------|-----------------------------|
| Flow rate (lpm)   | Min. flow pressure<br>psi | bar   | Max. flow pressure<br>psi | bar    | Max. static pressure<br>psi |
| » 24 / 48   | » 29.0                    | » 2,0 | » 116.0                   | » 8,0  | » 174.0      » 12,0         |
| » 100 / 200 / 300   | » 43.5                    | » 3,0 | » 116.0                   | » 8,0  | » 174.0      » 12,0         |
| » 200 / 400 / 600   | » 65.3                    | » 4,5 | » 116.0                   | » 8,0  | » 174.0      » 12,0         |
| Orifice plates according to TRVB 128 S with two additional orifice plates |                           |       |                           |        |                             |
| Flow rate (lpm)   | Min. flow pressure<br>psi | bar   | Max. flow pressure<br>psi | bar    | Max. static pressure<br>psi |
| » 800   | » 21.8                    | » 1,5 | » 145.0                   | » 10,0 | » 174.0      » 12,0         |
| » 60 / 200 / 600  | » 43.5                    | » 3,0 | » 145.0                   | » 10,0 | » 174.0      » 12,0         |
| » 300 / 600   | » 58.0                    | » 4,0 | » 145.0                   | » 10,0 | » 174.0      » 12,0         |
| » 600   | » 72.5                    | » 5,0 | » 145.0                   | » 10,0 | » 174.0      » 12,0         |
| » 300 / 600   | » 79.8                    | » 5,5 | » 145.0                   | » 10,0 | » 174.0      » 12,0         |

## PRODUCTION, CALIBRATION AND RECALIBRATION

- » Flow meter for determining the volume flow and pressure according to DIN 14462:2023-07 and TRVB 128S for regular inspection of fire hose reels.
- » The individual components and the complete system are calibrated.
- » Measurement of water flow, flow pressure and static pressure.
